

Geometric & Graphics Programming Lab: Lecture 9

Alberto Paoluzzi

October 30, 2017

- 1 Workshop N.2

- 2 Minimal git/github instructions

Workshop N.2

Modeling some IKEA bookcases

CERCA UN PRODOTTO O UN SERVIZIO

MOBILI, LIBRERIE E SCAFFALI

Non rinunciare alle tue passioni

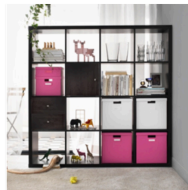

La casa è il luogo dove ti circondi degli oggetti che ami e che ti fanno stare bene. Dai mobili alle librerie, le nostre soluzioni per organizzare il soggiorno fanno spazio a ogni cosa, dai tuoi libri preferiti ai souvenir dei tuoi viaggi.

Librerie (242)
BESTÅ sistema componibile

Mobili per soggiorno componibili BESTÅ (182)
BESTÅ sistema componibile

Scaffali (231)
IVAR sistema componibile

Mensole (55)
Mensole complete, Ripiani, Staffe

Mobili e vetrine (46)
Mobili, Vetrine

Contenitori e cesti (115)
Soluzioni per ambienti di servizio, Contenitori per documenti/accessori media, Cesti, Scatole per vestiti

Buffet, credenze e tavoli consolle (11)
Buffet e credenze, Tavoli consolle

ALTRO

Buffet, credenze e tavoli consolle (11)

Look at some IKEA examples

- BILLY bookcases

Look at some IKEA examples

- BILLY bookcases
- KALLAX shelves

Look at some IKEA examples

- BILLY bookcases
- KALLAX shelves
- BILLY/OXBERG shelves

Look at some IKEA examples

- BILLY bookcases
- KALLAX shelves
- BILLY/OXBERG shelves
- BESTÄ shelves

Requirements

- Write a single notebook, named `workshop_02.ipynb`

Requirements

- Write a single notebook, named `workshop_02.ipynb`
- Choose a notebook Title, for example `<my_room_bookcase>`

Requirements

- Write a single notebook, named `workshop_02.ipynb`
- Choose a notebook Title, for example `<my_room_bookcase>`
- Start the notebook with a [web reference](#) and one/more [image/s](#) of your **type of furniture** (i.e. your chosen kind of furniture models)

Requirements

- Write a single notebook, named `workshop_02.ipynb`
- Choose a notebook Title, for example `<my_room_bookcase>`
- Start the notebook with a [web reference](#) and one/more [image/s](#) of your [type of furniture](#) (i.e. your chosen kind of furniture models)
- List the [variables](#) used in your code, with a [textual definition](#)

Requirements

- Write a single notebook, named `workshop_02.ipynb`
- Choose a notebook Title, for example `<my_room_bookcase>`
- Start the notebook with a `web reference` and one/more `image/s` of your `type of furniture` (i.e. your chosen kind of furniture models)
- List the `variables` used in your code, with a `textual definition`
- Provide a `short description` of used `geometric methods` you are going to implement

Requirements

- Write a single notebook, named `workshop_02.ipynb`
- Choose a notebook Title, for example `<my_room_bookcase>`
- Start the notebook with a `web reference` and one/more `image/s` of your `type of furniture` (i.e. your chosen kind of furniture models)
- List the `variables` used in your code, with a `textual definition`
- Provide a `short description` of used `geometric methods` you are going to implement
- Include the coding of a single parametric function named `ggpl_<my_bookcase>`

Requirements

- Write a single notebook, named `workshop_02.ipynb`
- Choose a notebook Title, for example `<my_room_bookcase>`
- Start the notebook with a `web reference` and one/more `image/s` of your `type of furniture` (i.e. your chosen kind of furniture models)
- List the `variables` used in your code, with a `textual definition`
- Provide a `short description` of used `geometric methods` you are going to implement
- Include the coding of a single parametric function named `ggpl_<my_bookcase>`
- Provide the `images` generated by `some executions` with different actual parameters.

Requirements

- Write a single notebook, named `workshop_02.ipynb`
- Choose a notebook Title, for example `<my_room_bookcase>`
- Start the notebook with a [web reference](#) and one/more [image/s](#) of your [type of furniture](#) (i.e. your chosen kind of furniture models)
- List the [variables](#) used in your code, with a [textual definition](#)
- Provide a [short description](#) of used [geometric methods](#) you are going to implement
- Include the coding of a single parametric function named `ggpl_<my_bookcase>`
- Provide the [images](#) generated by [some executions](#) with different actual parameters.
- Use measures in [meters \(m\)](#)

Style specs

- use **meaningfull** **identificators** (variables and parameters)

Style specs

- use **meaningfull** **identifiers** (variables and parameters)
- use **camelCase** ids

Style specs

- use **meaningfull** **identificators** (variables and parameters)
- use **camelCase** ids
- add **Python** **docstrings** (google for it)

Style specs

- use **meaningfull** **identificators** (variables and parameters)
- use **camelCase** ids
- add **Python** **docstrings** (google for it)
- produce a **single** notebook file, named **workshop_02.ipynb**

Style specs

- use **meaningfull identifiers** (variables and parameters)
- use **camelCase** ids
- add **Python docstrings** (google for it)
- produce a **single** notebook file, named **workshop_02.ipynb**
- file path: **your_repo/2017-10-30/workshop_02.ipynb**

Minimal git/github instructions

Minimal git/github instructions (1/2)

create your local repository

```
$ mkdir 2017-10-30
```

```
$ cd 2017-10-30
```

```
$ touch workshop_02.ipynb
```

Minimal git/github instructions (2/2)

commit your work

```
$ git add -A .
```

```
$ git commit -m "add a short note to commit"
```

```
$ git push origin master
```
